

# **SALT LAKE EMS DISTRICT**

## **OUT-OF-VALLEY TRANSPORT**

Revised 2011

If the patient or his/her family wishes them transported to a hospital outside of the Salt Lake Valley, but the patient is unstable or potentially unstable, the Paramedics will instruct the patient or family that the patient must first be evaluated and stabilized at the closest appropriate hospital.

If the patient's location is nearer to an out-of valley hospital, the patient may be transported to that hospital.
